

MPAC is Green

At **MPAC**, we are committed to green involvement at all levels at **MPAC**. We have extensive affiliations and associations with most leaders in Green technology and living in WNC, including:

Sundance Solar Power

Asheville Green Plumbing

Aqua Pro Solutions

WNC Nature Center

The property at the top of our list for the MPAC facility has been known since the days of the Cherokee as "Windy Ridge" with an average sustained wind speed of 17 miles per hour. This is well above what is required for a wind farm and we have already done extensive work toward including a wind farm at **MPAC**.

We are exploring return energy systems for the tread mills, elliptical trainers and stationary bikes we will have in abundance at **MPAC**. Solar power is a definite and we are working with the WNC Nature Center for their extensive involvement at our **MPAC** Nature Conservancy. We remain open to new technologies and ways of thinking to help us make a minimal impact **iMPACT** in WNC.
